

MMC-PRO

MULTISURFACE MOULD CLEANER NO SCRUBBING OR PRESSURE WASHING

The easiest and most effective treatment for MOULD,
ALGAE and MOSS on all hard surfaces

- APPLY IN MINUTES
- BIODEGRADABLE
- LONG LASTING
- HIGH M² COVERAGE

5 LITRE MMC-PRO

**MAKES MIN 25
MAX 50 LITRES**

INSTRUCTIONS FOR USE: DILUTE, APPLY, FINISH
For all exterior hard surfaces

BRICKWORK • MASONRY • ROOFING • DRIVEWAYS • ASPHALT • PAVING • TARMAC • FENCING • CAR PARKS
MONUMENTS • HEADSTONES • SLATE & STONE • CONCRETE • FIBREGLASS • PLASTIC & METAL SURFACES
TENNIS COURTS • GRAVEL • RENDERING • PAVEMENTS • PLAYGROUNDS • GLASS • PAINTWORK • DECKING

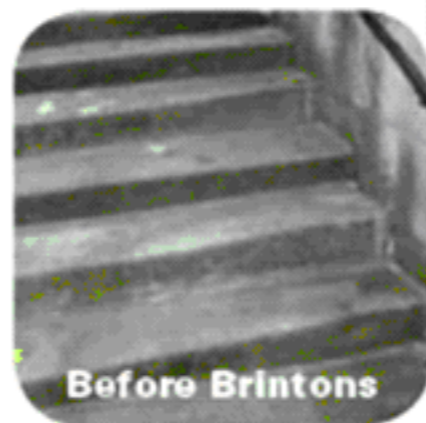

MMC-PRO

MULTISURFACE MOULD CLEANER PROFESSIONAL CONCENTRATE

PRODUCT INFORMATION

BRINTONS MMC-PRO: a high-performance broad spectrum anti-bacterial disinfectant, fungicide, algacide and detergent. Contains no bleach or acids, and is readily biodegradable to EC/OECD standards. Targets green/black mould, algae and moss on all exterior hard surfaces.

FUNCTION: MMC-PRO will kill mould and other growths within typically 2-4 days, and the secondary detergent action will help to gently clean the treated surface in the following weeks and months. Any dead growth that has not been removed by the elements can be lightly brushed away 2-4 months after treatment, or sooner if required.

Key Benefits...

100 % NON-ABRASIVE: Brintons should be applied at low pressure, and allowed to soak into the treated surface. There is no need for any aggressive or damaging application methods such as high-pressure water-blasting or steam cleaning.

EASY & QUICK APPLICATION: apply when surfaces are dry, and when no rain is expected in the following 3-4 hours. Simply dilute min 1:4 / max 1:9 with water in a low pressure sprayer and ensure that you saturate the surface. No scrubbing, no mess. It takes minutes.

MULTISURFACE: MMC-PRO is suitable for all exterior hard surfaces, including delicate surfaces such as plaster, rendering, mortar and glass.

LONG-LASTING EFFECT: small and diminishing residues will protect against re-growth. Typically this protection will be for 6-9 months after the first application, and 8-12 months after subsequent applications.

HIGH M² COVERAGE : 5-litre pack

	Dilution Rate	Useable Litres	Rough Surfaces	Smooth Surfaces
Normal purposes	1:4	25 L	75-100 m ²	175+ m ²
Light growth	max 1:9	50 L	150-200 m ²	350+ m ²

CHIP3 and EC CLASSIFICATION: MMC-PRO, as supplied : Xi, R36/38. COSHH data available. At the minimum dilution rate of 1:4 with water, the dilute has a zero classification. MMC-PRO is approved under the Control of Pesticides Regulations 1986, for use as directed. HSE No 7824.

PACKING: 4 x 5-litre units per box.
